NOTE:— Inhabitants of the Northern forest area — Indians, Trappers, Prospectors — depend to a very large extent on the Game Resources — Moose, Deer, Bear, Elk, Caribou, Waterfowl and Upland game — to provide the necessities of life.

NOTE:— While recent metal mining operations in the Pre-Cambrian rocks of Northern Saskatchewan and North West Territories might suggest similar possibilities in this area, investigations so far report that ". . . . . it would seem unlikely that extensive mineralized areas exist within this portion of the Pre-Cambrian Shield."
(Report No. 26, Research Council of Alberta).

REFERENCE

Surface Areas.

Approximate South-Eastern limit of Northern Forest Area. Excepting the Peace River, Grande Prairie and Fort Vermilion Districts, and the Valley of the Hay River, the area North-West of this line is chiefly forest, consisting of spruce, balsam, jack-pine, poplar and white birch, with Lodgepole pines and Alpine Fir in the foothills and mountain districts.

Approximate South-Eastern limit of "Parkland Area", or Transition between forest and prairie. This area is partly forested, more or less conforms to the better soil belts, and is particularly suitable for mixed farming.

Area South and East of this line is chiefly rolling prairie suitable for wheat farming and ranching, and produces special crops in irrigated districts.

Forest Reserve Boundaries.

National Park Boundaries.

Surface Resources (Agricultural, Forestry, Fisheries, Game, etc.) shown thus:

TIMBER — Developed.

TIMBER — Undeveloped.

Mineral Areas.

Western limit of Pre-Cambrian Shield in Alberta. Rich ore mining is indicated to the North and East. (See Note).

Except for the above and minor outcrops of Pre-Cambrian rocks near the B. C. boundary in the Rocky Mountains, the Province of Alberta is overlain by rocks of more recent Geological age, and the natural resources peculiar to them are indicated in the approximate position of outcrops or workings.

Mineral Resources shown thus:

COAL — Developed or Producing.

COAL — Undeveloped or Prospect.
